# Coverage-on-the-go

The ultimate and ruggedized solution  
for the soldier in the battlefield

## Coverage-on-the-go

Coverage-on-the-go automatically calculates the coverage of its radio at present position. The soldier immediately recognizes whether he is still able to communicate to his headquarters / deployed troops / soldiers or has to change his position without transmitting (silent mode).

## Key Features

- Rugged Lizard® RS13 – MIL-STD 810G compliant
- Easy single-click coverage calculation from present position on the battlefield
- Automatic location determination
- Georeferenced maps for operational area
- Standalone for offline operation
- Embedding the radio scenario into the tactical mission
- Optional integration into LS telcom spectrum management system
