

LS telcom is the world's leading provider of technologies and consulting services for the efficient use of the radio spectrum in all radio services. In an increasingly digital-networked world, we ensure that all spectrum users benefit maximally from radio services. We optimize spectrum management and use in all markets and market segments and enable new business models in vertical markets based on the Internet of Things (IoT).

Network / System Support Specialist

Main tasks

- Analyze network data to determine network usage, disk space availability, or server function. Perform ongoing performance tuning, hardware upgrades, and resource optimization as required. Configure CPU, memory, and disk partitions as required.
- Configure and define parameters for installation or testing of local area network (LAN), wide area network (WAN), hubs, routers, switches, controllers, multiplexers, or related networking equipment. Evaluate local area network (LAN) or wide area network (WAN) performance data to ensure sufficient availability or speed, to identify network problems, or for disaster recovery purposes.
- Operation support of multiple software development projects and teams in their duties, tasks, responsibilities and functions.
- Customer support including problem resolution on site as well as via e-mail, phone or via the internet through a remote connection.
- Work with cross functional teams including end users, technology experts, quality assurance analysts, product managers and developers to elaborate and maintain technical specifications.
- Assist, develop and maintain technical and system documentation, including installation and configuration procedures as required.
- Research and recommend innovative, and where possible automated approaches for system administration tasks. Identify approaches that leverage our resources and provide economies of scale.

Qualification Profile

- Experience with various platforms and operating systems including: IBM AIX, Linux /Unix Windows
- Experience in server, application and desktop virtualization (CITRIX, VMWARE),
- Experience implementing web services
- Good knowledge LDAP and directory structures
- Network implementation and performance tuning
- 5 years IT experience
- Oracle RDBMS version 12c and/or higher

What we offer you

- Excellent compensation, great benefits, flexible hours and an enjoyable work environment
- Collegial and highly professional team in a modern, international working environment
- Career opportunities worldwide
