

LS telcom AG is the world's leading provider of technologies and consulting services for the efficient use of radio spectrum in all radio services. In an increasingly digital networked world, we ensure that all spectrum users benefit maximally from radio services. We optimize spectrum management and use in all markets and market segments and enable new business models in vertical markets based on the Internet of Things (IoT).

The position is available at our Lichtenau or Dresden site.

## Systems Integration Engineer – Projects (m/f/d)

Join our dynamic team as a Systems Integration Engineer – Projects and play a decisive role in shaping the future of spectrum management system projects. We are looking for a highly skilled individual who can drive innovation, optimize business processes, and create solutions that make an impact on the international telecommunications landscape.

### Main tasks

- **Development of Customer Solutions:** Lead the process of designing, realizing and implementing customer specific configurations and development for spectrum management system projects.
- **Process Optimization:** Provide expert guidance to our international customers to optimize their business processes, emphasizing standardization and alignment with our solutions.
- **Requirements Management:** Create and manage a prioritized requirements list, ensuring that customer needs are efficiently and effectively met.
- **Work Package Definition:** Define, structure, and continually prioritize work packages for development, configuration and test-runs of customer solutions.
- **Release Coordination:** Coordinate release schedules at project, increment, and sprint levels, ensuring seamless project execution.

### Qualification Profile

- **Analytical Skills:** Possess strong analytical skills, able to create descriptive models and diagrams to convince stakeholders.
- **Education:** Have successfully completed vocational training, studies, or dual studies in engineering, preferably in the field of radio communications.
- **Professional Experience:** Ideally, have relevant professional experience in technical specification in the area of software development.
- **IT and Agile Experience:** Experience in IT systems and Cloud Hosting and familiarity with working in Scrum teams is a plus.
- **Internationality:** Fluency in English (additional languages would be an advantage) and willingness to travel worldwide.

### What we offer you

- Diversified, demanding and interesting field of activity
- Flexible working hours for the compatibility of work life balance
- Collegial and highly professional team in a modern, very international working environment
- Career opportunities in Germany as well as worldwide

### We are looking forward to your application!
