

LS telcom AG is an international company with more than 250 employees worldwide. Our head office is located in Lichtenau (Baden). We are a leading provider of consulting services and system solutions in connection with the efficient use of the radio frequency spectrum in all radio services. Our uniquely comprehensive expertise enables us to serve the entire wireless communications market segment with our product portfolio.

Spectrum Consultant (m/f)

Overview

Ideally you would have more than one of the following; a detailed understanding of radio communications technologies, experience of radio network planning or a good understanding of the commercial and technical implications of regulatory policy and strategy decisions.

In addition to delivering services and advice to our public and private sector clients, you will contribute to the further growth of LS telcom's radio spectrum consulting practice through the identification of opportunities, the preparation of proposals and the development of marketing materials.

This position is based at our central London office and you will have some opportunity for home working. You will enjoy regular international travel either to our company's group headquarters in Germany or to customer locations globally.

Minimum requirements

- Excellent verbal and written English language communications skills
- 5 years experience associated with radio communications technologies, network planning or spectrum management and spectrum policy making
- A good Bachelor's Degree in a relevant subject
- Willingness and ability to travel internationally
- Some experience of direct customer interaction

Experience, Skills and Knowledge

- Detailed technical understanding of wireless technologies and an ability to explain these to non-technical people
- Experience of radio network planning and use of commercial planning tools
- Knowledge of the international and national frameworks for spectrum management
- Understanding of spectrum management policies and strategies at an organisational, national, regional or international level
- Ability to analyse complex requirements and develop and implement methodologies to derive solutions and recommendations
- Solid grasp of spectrum economics (pricing, valuation, trading, auctions)
- Ability to identify and convert consulting opportunities in radio spectrum related fields
- Ability to prepare deliverables to the satisfaction of clients within agreed budget and time constraints
- Ability to manage own work and project teams
- Experience of developing and maintaining positive customer relationships with a view to business development and growth
- Ability to share knowledge and provide thought leadership to other team members

Other requirements

- Ability to multitask and prioritise
- Confident user of MS Office and analytical software tools
- Confident speaker and presenter
- Creative thinker and good team player
- European nationality or a valid EU work permit
- Knowledge of a foreign language (especially French, German or Spanish) would be an advantage
- Membership of a professional industrial body would be an advantage

We are looking forward to receiving your application!
