

LS telcom AG is an international company with approximately 235 employees worldwide. Our Headquarter is located in Lichtenau (Baden, Germany). We are the leading provider of consulting services and system solutions regarding the efficient use of radio frequency spectrums in all radio services. We have a unique comprehensive competence that enables us to serve the complete market segment of wireless communications with our product portfolio.

Business Analyst Software System Projects (m/w/d)

Main tasks

- Shape the customer solution for spectrum management system projects (definition, realization and implementation)
- Act as technical interface to the customer during the entire duration of a project
- Consolidate the requirements with end users, IT and system architects on customer side
- Provide guidance for our primarily international customers to optimize their business processes in terms of standardization and adaptation to standard LS solutions
- Support customers in describing functional and non-functional requirements. Responsibility for creating a prioritized requirements list and a global system architecture as the baseline of the project scope
- Steer the development of the customer solution in close cooperation with our customer and LS teams involved
- Structure and continuously prioritize the necessary work packages for the development, configuration and test runs of the customer solution. Coordinate the release management (on project, increment and sprint level)
- Comply with internal processes and project framework (for example change and risk management) and support further development of these methods

Qualification Profile

- Successfully completed engineering degree or similar education
- Relevant professional experience of technical specification in the area of software development, IT systems and Cloud Hosting as well as experiences in working with Scrum teams is a plus
- Ideally you have experience in the field of radio communication or you gained the knowledge within the framework of a promotion
- Experience handling Atlassian solutions (JIRA, Confluence) or comparable tools is an advantage
- Very good analytical skills (e.g. creating models)
- We expect very good command of English (further languages would be an advantage) and willingness to travel (worldwide)
- You provide the competency and will to act on self-responsibility and to actively shape our project processes
- We expect a high level of organizational skills and flexibility

What we offer you

- Diversified, demanding and interesting field of activity
- Flexible working hours for the compatibility of work and private life
- Collegial and highly professional team in a modern, international working environment
- Career opportunities in Germany as well as worldwide

We are looking forward to your application!
